Hi, I'm Salvatore
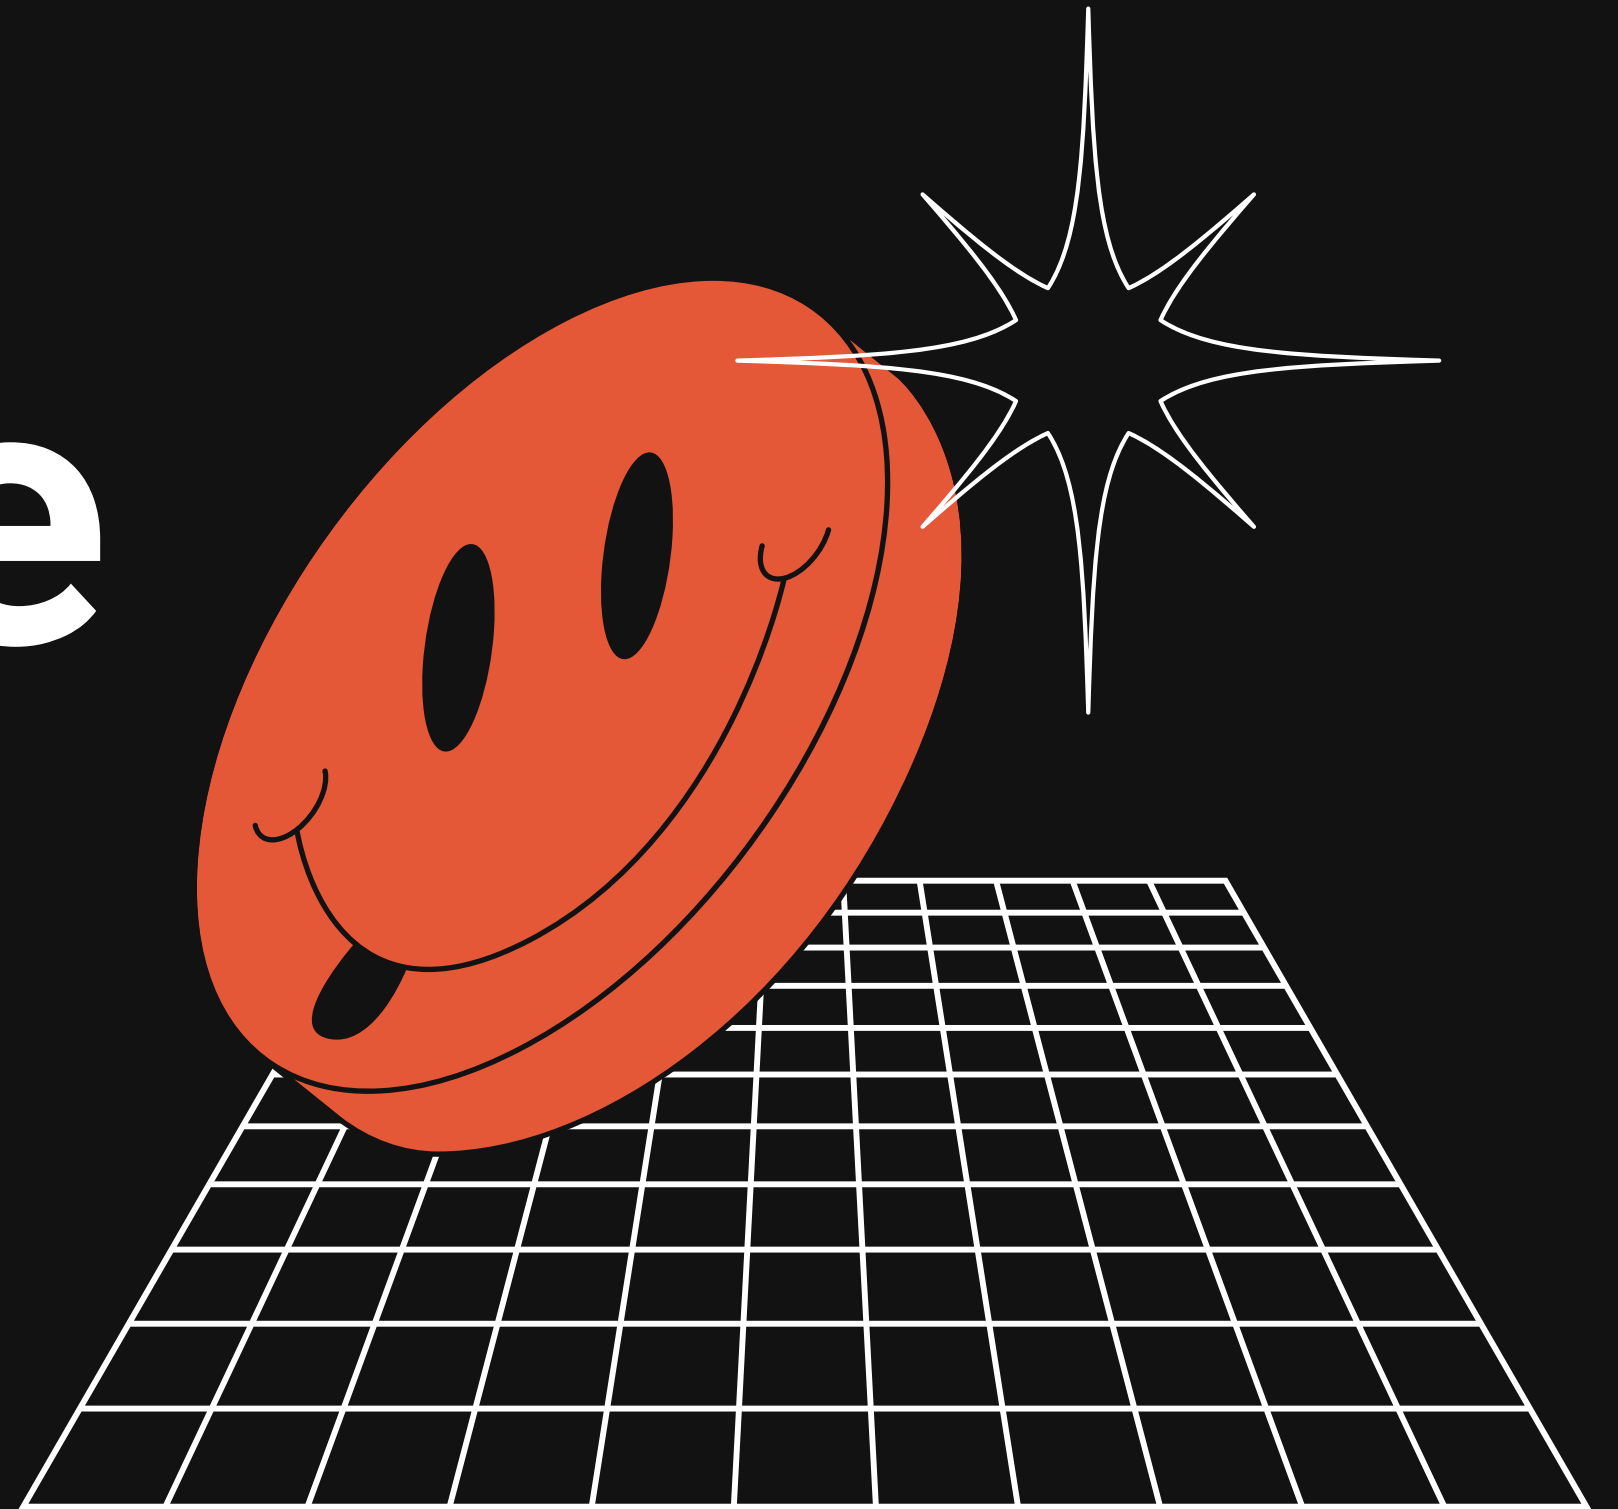

and I'm a front end developer.

My name is
Salvatore
D'Agostino

I am improving my skills thanks to the start2impact courses

My Educational Background

I graduated from high school and I'm studying computer engineering at the "Luigi Vanvitelli" university

My Personal Skills

I always want to learn more and I am a **good team player**.

My Portfolio

This is my first project.
I used Html and Css to create my personal portfolio

I used various shades of gray and black to give the site a touch of elegance.

This is just my first project, but many more are coming.
